SatStation AdvanceTouch - Iridium

Communication is Now Just a Touch Away

An Industry first! The SatStation AdvanceTouch - Iridium enables you to place and receive calls without the need for a separate handset. By either utilizing the Privacy Handset or the built-in loudspeaker with echo-cancellation and background noise filtering for a full duplex hands-free operation. The Privacy Handset provides the convenience of answering calls when it is lifted and ending the call as soon as the handset is placed on the dock.....

Product Features:

- First touch screen Iridium phone
- Sleek and professional design
- Store up to 1,000 contacts
- SMS capability with full on screen keyboard
- Full duplex hands-free operation
- Two mode operation: loudspeaker or private talk (via Privacy Handset)
- Echo cancellation and background noise filtering
- Audio out (allows conversations to be recorded)
- Made in the USA (Miami, Florida)
